<b>Q34 - We welcome your written comments below. What is something/are some things that the instructor does well, e.g., something you hope that the instructor will continue to do in the class in the future?</b>

1	enthusiastic, approachable, helpful to students, learns students' names
2	You're a fantastic instructor and I hope you continue to teach! Thank you for all that you've done for us this semester!
3	Very kind. Makes it a priority that all students have their questions answered clearly and helps everyone to understand the information.
4	The instructor gave plenty time to understand the content.
5	She's very nice and I always look forward to going to the lab even though it can be difficult.
6	She is prepared for labs and gives helpful hints for success.
7	N/A
8	Kim should teach the class. She made the material easy to understand, relatable to other material, and somewhat interesting even though this is a pretty dry class.
9	Kim is great! She is always so welcoming and has a smile on her face. She is very good about explaining things that you don't understand and is willing to help everyone who is struggling. She also asks follow up questions to ensure that she understands your question before she answers it. I would keep doing what your doing with the power point as that is very helpful and keep up with the hints about taking a picture of the slides that will help you on the lab. Overall keep doing what your doing and never loose your smile!
10	Kim Kim is always ready to assist students in the Lab. Even with her accent she makes sure to talk clearly and present the information in a way that makes it easy to understand. She is always energetic and is excited for students when they score 100% on the labs. She is very nice and doesn't make students feel bad when they need help on a question.
11	Great at answering questions and making sure we understand
12	Fantastic job explaining and helping us during lab. Always pushed us to do our best work!! Kim is the best!
13	Absolutely the best and most enthusiastic TA I've had!

<b>Q35 - Make a suggestion(s) for improving the course (a criticism alone is not helpful; tell your instructor how you would fix any problem).</b>

1	slides sometimes go too fast before class
2	There should be more time for the Lab session. Some labs take more time than others and I always feel rushed and sometimes I am not able to fully complete the lab in the allotted time.
3	Talk fast

<b>4</b>	Sometimes the labs ask for too much in the time we have. Throughout the semester they got better at timing the labs but it's still a problem sometimes.
<b>5</b>	Sometime she would almost be too enthusiastic and get caught up talking to a student and forget to answer another student's question.
<b>6</b>	None
<b>7</b>	N/A
<b>8</b>	N/A; course is good how it is.
<b>9</b>	Maybe rely less on youtube videos to explain content.
<b>10</b>	Make the lab time just a little longer.
<b>11</b>	Keep doing what you are doing!!
